ABSTRACT

The Wisconsin Technical College System (WTCS) conducts an annual Graduate Follow-Up Survey to gather data regarding the activities and perceptions of students approximately 6 months after their graduation from the colleges. The primary objectives of the survey are to identify the current activities of program graduates, to determine the extent to which current activities are related to the graduates' educational programs, to provide information to be used in career awareness and planning efforts, and to provide data to facilitate program planning, evaluation, and development. The 16 colleges of the WTCS surveyed graduates of programs in their respective colleges between October and December 2002. Of the 17,833 graduates surveyed, 13,420 responded, for a response rate of 75%. The labor force does not include those who are unemployed and are not seeking employment. Full-time employment is defined as 35 or more hours per week. At least 93% of respondents were employed, with 77% of those employed in areas related to their educational programs. More than 21% were employed while in training, and 46% after training. The top three median annual salaries by type of degree granted were: (1) associate degree ($30,769); (2) two-year technical diploma ($26,361); and (3) liberal arts transfer ($24,000). The document also offers median salaries by discipline. Research instrument appended. (NB)

OVERVIEW

Introduction

The Graduate Follow-Up Survey is conducted annually to gather data regarding the activities and perceptions of students approximately six months after their graduation from Wisconsin's Technical Colleges.

The primary objectives of the survey are to identify the current activities of program graduates, to determine the extent to which current activities are related to the graduates' educational programs, to provide information to be used as tools in career awareness and planning efforts for those making or assisting in career decisions, and to provide data to facilitate program planning, evaluation and development.

Methodology

The 16 colleges in the Wisconsin Technical College System surveyed graduates of programs in their respective colleges. The survey was conducted between October and December, 2002. A total of ***17,833 graduates*** were surveyed statewide with ***13,420 responding***, resulting in a ***response rate of 75 percent***. These responses were submitted to the state office for compilation of this statewide report. A copy of the survey instrument is included as Appendix A. Basic concepts and measures used throughout the report are defined below.

The ***labor force*** includes all employed and unemployed respondents except those who are unemployed and not seeking employment. A person is considered ***employed*** if he or she worked for pay or profit at the time of the survey. Individuals in any of these groups may be employed full-time or part-time. Full-time employment is defined as 35 or more hours per week; part-time employment is less than 35 hours per week. A person is considered to be seeking employment if he or she performed no work for pay or profit at the time of the survey but was looking for work.

Survey respondents who are employed classified their jobs as related or not related to the training they received. In the follow-up data tables beginning on page 12, employed respondents who indicate their job is related to their training are counted in the ***employed related*** category. Thus, the employed related category is a subset of the employed category.

Salary figures are reported for respondents who indicate they are employed full-time in jobs related to their training. The ***median salary*** is the mid-point of salaries reported with half of the salaries below and half above the mid-point. There must be a minimum of four employed-related respondents in order to publish a median salary for any given program. (Please note that some respondents did not include their salary in the survey.)

DEMOGRAPHIC COMPOSITION OF 2001-02 GRADUATES

The following table shows the sex and ethnicity of all of the 17,833 2001-02 graduates by type of degree granted and by instructional division. There are 4,969 more females than males. Minorities represented 9.9 percent of all graduates, while 4.5 percent of the graduates did not report their ethnicity. (Please note N/R means Not Reported.)

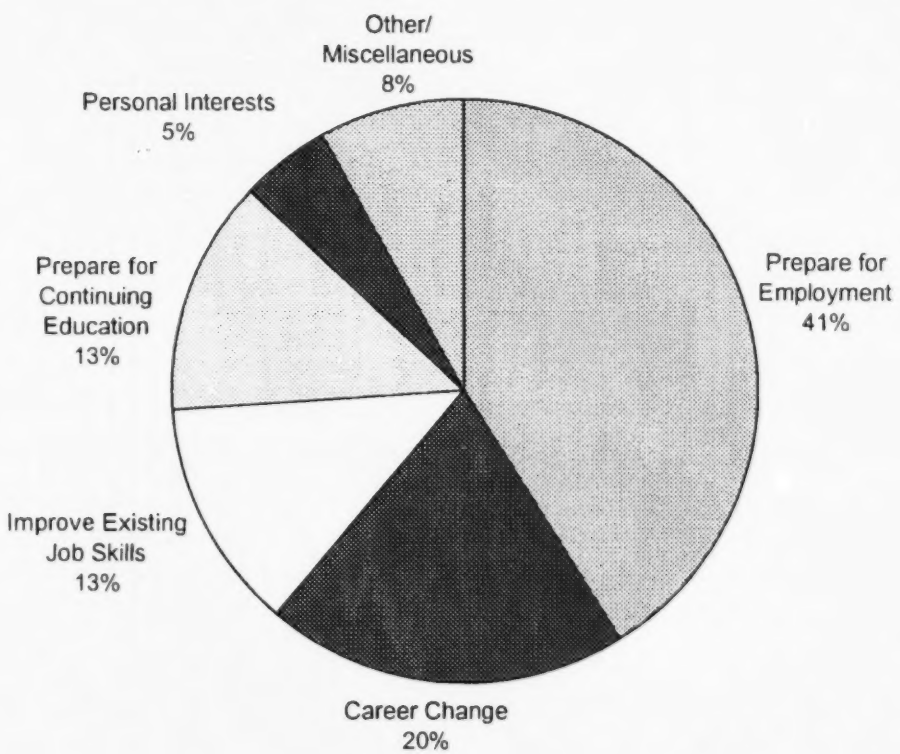
30-34 Years	1,683	9.44%
35-44 Years	2,583	14.48%
45-54 Years	1,352	7.58%
55-64 Years	195	1.09%
65 +	13	0.07%
Not Reported	83	0.47%
TOTAL	17,833	100.00%

REASON FOR ATTENDING

Graduates were asked to give their reason for attending a technical college. The majority of respondents, 41 percent, said it was to prepare to obtain employment, while 20 percent said it was to make a career change. Thirteen percent said it was to improve existing job skills and 13 percent are preparing to continue their education. Five percent attended for personal interests and eight percent cited other or miscellaneous reasons.



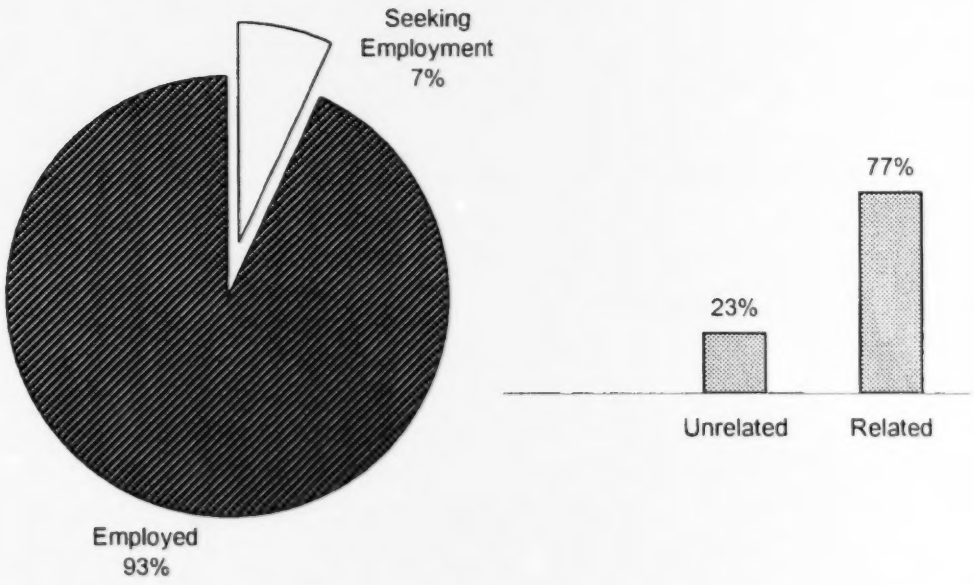
SATISFACTION WITH TRAINING

Graduates rated the training they received. Of the graduates responding, 97 percent indicated that they were satisfied or very satisfied with their training, and three percent stated that they were unsatisfied or very unsatisfied.

BEST COPY AVAILABLE

EMPLOYMENT STATUS

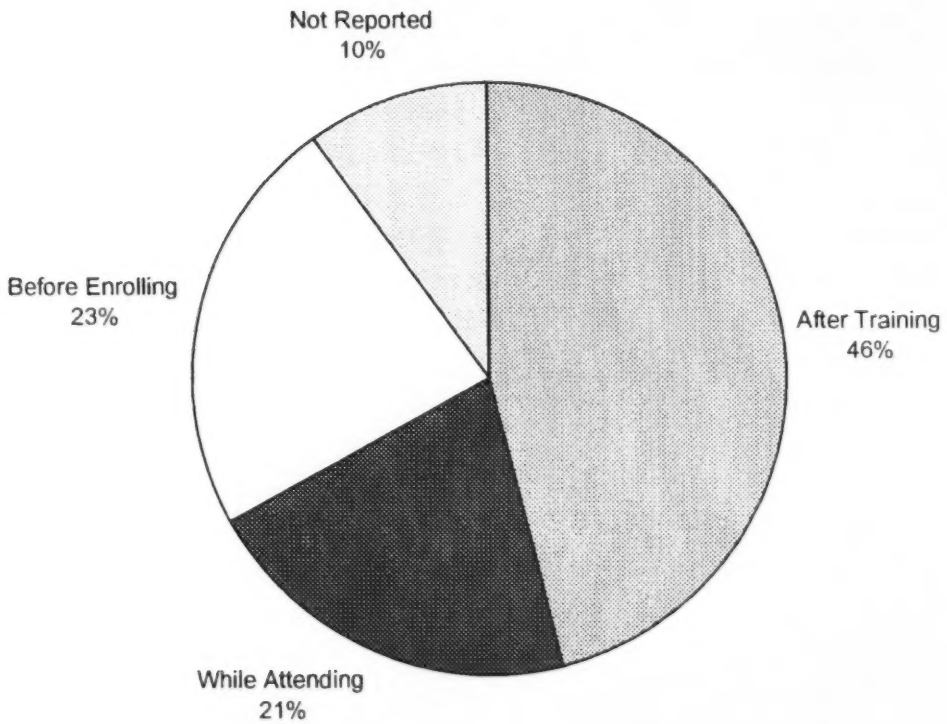
Of the respondents who are in the labor force, 93 percent are employed and 7 percent are still seeking employment. Within the group who are employed, 77 percent indicated that their job is related to the training received and 23 percent reported that their job is not related to the training received.



BEST COPY AVAILABLE

WHEN EMPLOYED

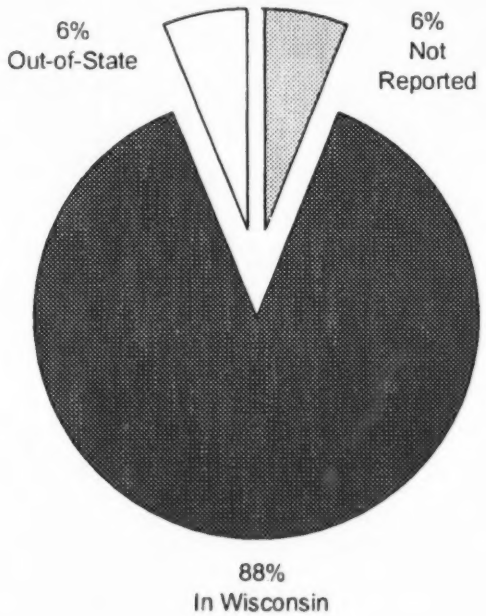
Of the 10,943 respondents who reported being employed, 46 percent said they became employed after their technical college training; 23 percent indicated they were employed before they enrolled; 21 percent said they got a job while they were attending technical college; and 10 percent did not indicate when they became employed.

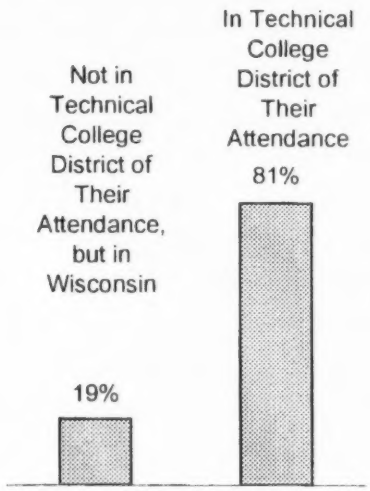


BEST COPY AVAILABLE

EMPLOYMENT LOCATION

As indicated below, 88 percent of the graduates who responded to the survey are employed in Wisconsin, six percent are employed out-of-state, and six percent did not indicate where they are employed. Of those employed in Wisconsin, 81 percent are employed in the technical college district where they received their training, and 19 percent are employed in another district.

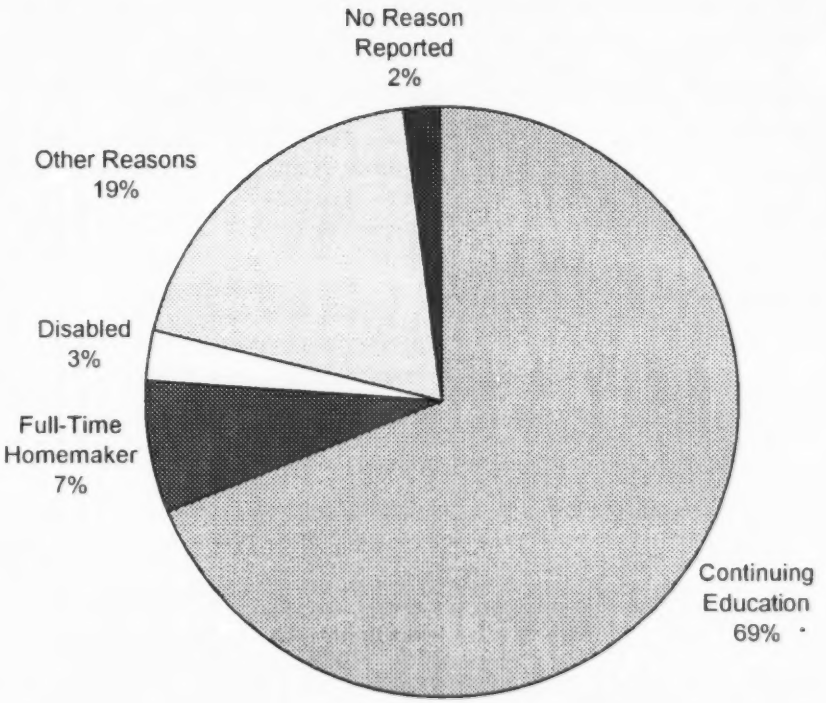




BEST COPY AVAILABLE

REASON NOT IN LABOR FORCE

Of the 13,420 respondents, 1,597 indicated they were not in the labor market. Sixty-nine percent said they were continuing their education; 7 percent were full-time homemakers; 3 percent were disabled; 19 percent gave other reasons; and 2 percent did not give a reason as to why they were not in the labor market.



BEST COPY AVAILABLE

EMPLOYMENT RELATED TO TRAINING BY INSTRUCTIONAL DIVISION

Statewide in all instructional areas, 77 percent of the graduates who responded to the survey obtained employment in occupations related to their training. The chart below shows the number employed and the number and percent of those employed related for each instructional area from highest percentage employed related (Agribusiness) to lowest (Graphics).

MEDIAN ANNUAL SALARIES BY INSTRUCTIONAL DIVISION

The chart below shows median annual salaries in each instructional division. The median salary reflects the mid-point of all salaries reported for each instructional division. Salary figures are based only on those respondents who report being employed full-time in occupations related to their training. The median annual salary for all 2001-02 technical college graduates is $27,000.

MEDIAN ANNUAL SALARIES
BY TYPE OF DEGREE GRANTED

The chart below shows median annual salaries by the type of degree granted. The median salary reflects the mid-point of all salaries reported for each degree. Salary figures are based only on those respondents who report being employed full-time in occupations related to their training. The median annual salary for all 2001-02 technical college graduates is $27,000.
